WORK EXPERIENCE

February 2024 -
July 2025

NOC Bauman Moscow State Technical University

Information technology, system
integration, software development

EDUCATION

2024-2026

Bauman Moscow State Technical University

I am studying for a master's degree in
software engineering

2020-2024

Bauman Moscow State Technical University

Bachelor's Degree in Electronics and Nanoelectronics

ADDITIONAL EDUCATION

Web-development

Digital Department at Bauman Moscow State Technical University
Web Developer

Number +7 (916) 696-76-48

Email address artem.borisov2002@mail.ru

SKILLS

Languages

- Russian
- English - B1

Hard Skills

- Python3
- Numpy
- Pandas
- Scikit-learn
- Matplotlib
- C++20
- STL
- Git, GitHub, GitLab, CI/CD
- PostgreSQL
- Linux
- Docker
- Algorithms and Data Structures
- ML/DS

ABOUT ME

Education:

Bachelor's degree from Bauman Moscow State Technical University (BMSTU), majoring in Electronics and Nanoelectronics.

Currently pursuing a Master's degree at BMSTU in Software Engineering.

Completed Web-Developer courses: Digital Department at Bauman Moscow State Technical University

Development Experience:

Over 3 years of experience programming on Python3, over 3 years of experience programming on C++.

For more than 1 year, I have been working at the Scientific and Educational Center at BMSTU, developing control and data transmission systems for technological installations.

As part of my bachelor's thesis, I developed a system for simulating the desorption process.

ABOUT ME

Pet Projects:

1. Developed a recommendation and dialogue system for protein products. The system suggested items based on taste, brand, price, and weight preferences, and included a dialogue interface that responded to natural language queries. Implemented and compared multiple similarity metrics (Euclidean, Jaccard, Manhattan, combined measure), built a heatmap for product similarity visualization, and created a user interface for interaction.
2. Gained hands-on experience in data analysis using Kaggle datasets, applying Python (Pandas, NumPy, Scikit-learn) for preprocessing, feature engineering, and exploratory data analysis (EDA).

Skills and Technologies:

1. Strong knowledge of Python3;
2. Knowledge and experience with Pandas, Numpy, Scikit-learn, Matplotlib, pymorphy, a bit PyTorch;
3. Strong knowledge of C++17/20, STL, and multithreading;
4. 3+ years of experience developing under Linux OS;
5. Experience with Docker, CI/CD (GitHub Actions);
6. Experience working with PostgreSQL (writing SQL queries);
7. Experience developing recommendation and dialog system;
8. Experience in data analysis using Kaggle datasets;
9. Experience developing distributed systems;
10. Knowledge of network protocols: TCP/IP, UDP, HTTP/2, HTTPS.
